Skills

Javascript

HTML

CSS

MongoDB

Node.js

React

React-Native

Express

Git

C++

Web Developer with 3 years part-time experience. I love to do both front end and back end work and seeing a project from conception to completion. My work is rooted in the desire to change lives while providing and analyzing data to inform smarter business decisions.

Experience

Jun 2015 - Present

Web Development Intern

American Center for Law and Justice (ACLJ)

- Worked with ACLJ development team creating, maintaining, and designing organization websites and applications
- Received extensive knowledge with Node.js, Javascript, HTML, CSS, React, React-Native, and MongoDB
- Full-stack development involving front-end, back-end, and database management
- Part of team that created mobile application using React-Native (2015)
- Primary developer for partner organization's website eclj.org (2016)
- Work on the admin/content management application
- Data analytics and reporting involving financials and member metrics reported to senior staff

Aug 2016 - May 2017 2015

Web Developer

Liberty University School of Music

I worked with a team of students to create GLOW, a community service project for LU's School of Music. The project was a web application using Node.js, HTML, Mongodb, and AWS to host media from around the world.

Aug 2017 - Present

Web and Mobile Developer

Liberty University Capstone

- Created application for organization working at refugee camps in Europe
- Developed application with Node.js as an interface for a Mongo database
- Developed React-Native (Android) application with external fingerprint connection to track recipient access when receiving materials from lines at a camp to prevent abuse of system

Education

August 2013 - May 2018

Liberty University

BS in Computer Science
3.47 GPA

August 2009 - May 2013

Scottsbluff High School
