---

Web Developer with 4 years experience. I love to do both front end and back end work and seeing a project from conception to completion. My work is rooted in the desire to change lives while providing and analyzing data to inform smarter business decisions.

## Experience

Jun 2015 - Present

**Junior Developer/Data Analyst** (3 years as remote intern)

*American Center for Law and Justice (ACLJ)*

- Work with ACLJ development team creating, maintaining, and designing organization websites and applications
- Full-stack development involving front-end, back-end, and database management
- Developed iOS and Android mobile application using React-Native
- Experience with HTML, CSS, JavaScript, React, React-Native, MongoDB, AWS
- Data analytics and reporting involving financials and member metrics reported to senior staff using custom built reports and Elasticsearch/Kibana
- Primary developer for partner organization's website eclj.org

Aug 2016 - May 2017

**Web Developer**

*Liberty University School of Music*

I worked with a team of students to create GLOW, a community service project for LU's School of Music using Node.js, HTML, Mongodb, and AWS to host media from around the world.

Aug 2017 - May 2018

**Web and Mobile Developer**

*Liberty University Capstone*

- Developed application with Node.js as an interface for a Mongo database to be used in refugee camps in Europe.
- Developed React-Native (Android) application with external fingerprint connection to track recipient access to resources from lines at a camp to prevent abuse of system.

## Education

Aug 2013 - May 2018

**Liberty University**

BS in Computer Science - 3.47 GPA

Aug 2009 - May 2013

**Scottsbluff High School**
